

Cross-linker monomer

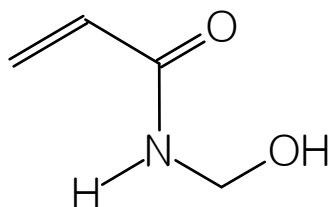

PAC-C-NMA

N-Methylol acrylamide (low formaline)

Physical properties

CAS No.	924-42-5
Appearance	Clear to slightly hazy liquid yellow to pink in color.
Total Solids, % by Weight	46-50
Free Formaldehyde, % by Weight	0.1 max.
Copper in Solution, ppm	1.0 max
MEHQ Inhibitor, ppm	30 ± 5
pH (as is)	5.5 – 7.0
Specific Gravity at 25°C	1.05

Application

A bi-functional monomer with a polymerizable vinyl group and hydroxymethyl functionality. provide high solvent resistance, wet strength, and adhesive properties

- . Latex Adhesives
- . Paper Coatings
- . Latexes for Textiles and Non-wovens
