

BA720 100% Solid Grade Thermoplastic Acrylic Resin

Introduction

BA720 & BN720, Methacrylic resins with low molecular weight from LG MMA are designed for use in protective coatings for plastics, printing ink and PVC finishes.

They have some features such as universal solubility, excellent chemical resistance and good compatibility with other paint raw materials and pigments.

They can provide good adhesion to various substrates, such as plastics, paper, textiles and metal for indoor and outdoor applications.

Proper plastic substrates are PMMA, ABS, polystyrene(PS) and PVC.

Typical Application

- ☐ Protective coating for plastics
- ☐ Printing ink
- ☐ PVC finishes

Physical Properties

Appearance	Powder
Solid content, mass %	100
Molecular weight (Mw, ave.)	50,000
Density @ 25°C, kg/liter	1.20
Brookfield viscosity at 23°C, cPs (40% solution in MEK)	2,130
Glass transition temperature (°C)	116
Acid value (mg KOH/g)	2

REMARKS : The listed values should be used for reference purpose only.

BA720 100% Solid Grade Thermoplastic Acrylic Resin

Resins Viscosity in Various Solvents

- Values are Brookfield viscosity (cP), at 23°C of a 40% solids solution, except as noted.
- Superscript indicates % solids.
- I.S. : Insoluble / P.S. : Partially soluble (Test Method : Solubility 20wt% resin at room temperature)

Safe Handling Information

LG MMA Material Safety Data Sheet contain pertinent information that you need to protect your employees and customers against any known health and safety hazards associated with our products.
